WORK EXPERIENCE

Whole In One Health

Software Developer Intern   *Nov 2023 - current*

- Assisting with fixing bugs found in React Native App.
- Using Linear to track and review bugs.
- Help create new features and updating existing pages.

Crocodile Solutions, Inc.

Front End Developer, Contract - Remote   *June 2023-August 2023*

- Redesigned login UI from .NET to React using bootstrap for styling.
- Integrated an API which allows users to login, force login and reset password.
- Used an API to fetch files and create a UI to show all folders and files as well as added a drag and drop to download a max of 5 files.

Childhood Cancer Society   **New Jersey**

Software Developer Intern - Remote   *April 2023-August 2023*

- Learned to use NextJS, Typescript, Tailwind, and Prisma to create responsive reusable UI components.
- Implemented NextAuth to authenticate users to specific pages.
- Developed a Kudos Widget with AWS S3 bucket to store images and retrieve them.
- Participated in team meetings and suggesting new ideas to add to the application.
- Created API endpoints to fetch data to the front end.

George Mason University   **Fairfax, Virginia**

Telecom Technician   *January 2021-current*

- Assisted with transitioning from AVAYA to Vonage, a cloud-based VoIP system.
- Swiftly identified and resolved issues with VoIP, Analog, Printers, and Fax Machines.
- Managed phone records, including creating new user entries and updating existing information.
- Assisted with relocating/installing new VoIP phones for over 100 employees in new building.

Classroom Support Technician   *April 2019 - December 2020*

- Provided support to Mason Professors on classroom A/V technologies by troubleshooting over the phone and in person.
- Created support tickets to document workflow process.
- Built and deployed new computers to replace outdated computers in classrooms.

EDUCATION

George Mason University   **Fairfax, Virginia**

B.S. Information Technology   *2019-2022*

Northern Virginia Community College   **Annandale, Virginia**

A.D. Computer Science   *2015-2018*

Projects

The Hub

- Full Stack site which allows users to create a group and create tasks in that group for users to see. Users can be added to the group with their unique id.
- Groups, projects, and users are stored in the Firestore Database provided by Firebase.
- Used Typescript for the front end and Firebase for all the backend including authorization and hosting.

Blog Page

- Full stack website created using T3 Stack (NextJs, Tailwind, NextAuth, Prisma, and tRCP).
- Implemented and learned new libraries and how they work by reading documentation.
- Created APIs on the backend to retrieve data from MongoDB.

SKILLS & TECHNOLOGY

Front-End: HTML, CSS, JavaScript, React, Bootstrap, Tailwind, Typescript, NextJS, T3 stack, React Native
Back-End: NodeJS, PHP, ASP .Net, Prisma, ExpressJS
Databases: MySQL, Firebase, PostgreSQL, MongoDB
Technologies: Rest API, Vercel, Netlify, Heroku, AWS S3, Linear, Jest, Git
Certifications: AWS CCP
